

HDM - DOCUMENTARY AIRED ON DISCOVERY CHANNEL

This national documentary exploring a mission to Mars featured an in-depth coverage of some of the high tech materials used in the new astronaut space suit. **SuperFabric®** brand materials were used to cover the entire palm area of the glove to provide abrasion, cut, and puncture protection. Aired 6/25/08.

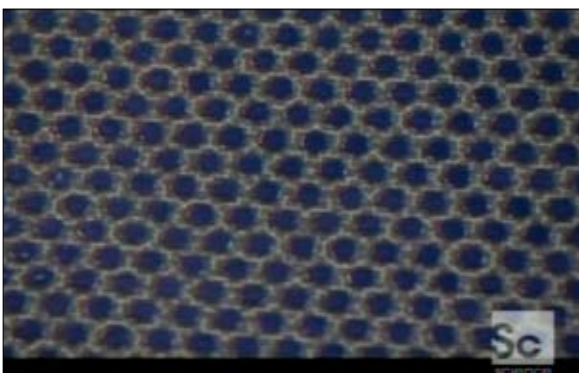

The astronaut's glove is covered with a custom **SuperFabric®** brand material in the palm.

Despite the protection it offers, it is very flexible.

Here, it passes an extreme cold test.

Shots of **SuperFabric®** materials used in testing.
